

# FLAUNTY FROCKS

## Leggy lovelies let loose

**P**REPARE to flaunt those pins if you want to leg it up the fashion stakes this coming season!

Keep waxing, girls — you'll be baring those legs all through those spring nights if this collection of short and chic frocks is anything to go by.

It's not just trousers that have short hemlines this season — frocks are also hovering way above the knee.

The look can be gym-slip schoolgirl, '50s prom queen, vamp, rock chick or girlie glam: just as long as the effect is sexy and leggy.

And you're really dressed to impress in these gorgeous little frocks from Heart & Soul.

They are guaranteed to turn heads right through to the summer months.

But be warned: the fashion for leggy looks is all very good news for well-turned ankles but not so great for chunky ones. This look is definitely for the young and lean of limb.

Those who are more young at heart should team dresses with leggings or tights for a more flattering style.
